

2026 IRRIGATION SEASON ENDING SOON

Secondary Water System Shutdown Begins October 15th

To ensure a smooth transition, we recommend that all customers with secondary water close their stop and waste valve and drain their sprinkler system prior to this date

Reuse Water Usage Reaches Significant Milestone

Nearly 1/3 of water used in the District through peak irrigation season this year was reuse water! Any water reused reduces the amount of drinking water used for outdoor irrigation

Exceeded 10% Water Conservation Goal

A big thank you to all of our customers who conserved water this irrigation season and helped us achieve over 12% reduction in water use compared to last year! Every drop saved helps with next years supply
