

RV Dump To Remain Closed in 2024

2024 OPERATION SEASON

The Magna Water District RV dump will remain closed for the 2024 operating season. Despite our best efforts, the ongoing issue of foreign objects and debris entering the system has resulted in equipment damage, high repair costs, and disruptions to our regular operations. Furthermore, the recent opening of three alternative RV dump locations in town has resulted in a significant decrease in customer usage. As we continue to evaluate the impact of the RV dump on wastewater operations, we anticipate that the facility will remain closed for the 2024 season. Please see below for alternative RV dump service providers within the district.

Alternative RV Dump Locations
