# Magna Waters Award Winning Wastewater System Cleans up in 2023!

The district has been awarded the **RH Borden “Smart City Award” for 2023**. Of the 130+ client cities RH Borden represents nation wide; they selected Magna for its continued use of cutting-edge tools to maintain, service and manage the wastewater systems.

Each year the Water Environment Association of Utah evaluates nominated systems throughout the state of Utah to be awarded and recognized at the annual conference. This year the Magna Collections System has won the **2023 WEAU Wastewater Collections System of the Year Award**. The system was highlighted for their service, maintenance, and inspection efficiency, along with their meticulous organization and record keeping. The districts collections crew has now won this award three times since 2018.

In the WEAU individuals award category our very own Scott Beck from the Wastewater Treatment Plant won the **2023 WEAU Wastewater Treatment Plant Operator of the year award**. He has been an integral part of maintaining critical equipment, running regulatory samples and training new operators. Scott started with the district in 2012 and is a great example to all district employees.
